

OUA Electroacoustic Music Festival 2017

秋の電子音響祭 2017

ごあいさつ

この度は大阪芸術大学音楽学科 音楽・音響デザインコース「秋の電子音響祭 2017」
OUA Electroacoustic Music Festival 2017 にお越し頂き有り難うございます。この音響祭は音楽学科 音楽・音響デザインコースで電子音響音楽や音響技術を学ぶ学生を中心とした成果発表の場として、さらに通信教育部音楽学科生や本学卒業生の作品発表の場として、より多くの電子音響音楽作品を発信しようと企画され、本年度は「親しみやすい・開かれた電子音響」をテーマにしています。

今回の音響祭では、昨年度までのアコースマティック作品に加え、SR(Sound Reinforcement)を駆使したライブパフォーマンスやサウンドインスタレーションの作品展示を行い、在校生による新作コンサートや本学を卒業して世界で活躍するアーティスト達によるコンサートが開催されます。さらに、新しく国際交流としてインターネットを通じた作品募集を行い、国内はもとより、アジア、アメリカ、ヨーロッパなど世界30カ国以上のアーティストから作品が寄せられました。これらの作品によるヴァーチャルコンサートを通じて、世界中の素晴らしい作品に出会えるチャンスがさらに広がると確信しています。

この音響祭に準備段階から協力していただいた多くの方々、そして世界各国から作品を寄せられたアーティストの皆様に厚く御礼申し上げますと共に、この催しが今後益々発展致しますよう、一層のご理解とご支援のほど、宜しくお願いいたします。

大阪芸術大学 音楽学科教授 芹澤秀近

作品解説 ～在校生／ゲストコンサート／インスタレーション作品～

在校生ライブパフォーマンス 1

1. きゅぴん とうぴん ちゅちゅちゅ

藤田朝陽(M14) 山本奈央子(M14)

進行中の卒業制作「実験ドームの機材の再生と新しいドーム音響の提案」を具体的に示そうとする作品。ドーム空間だからこそできる音響を作品上演により実現させる。その過程の中間発表です。システムは、生まれ、成長し、完成する。完成するということは、滅びの始まりを意味する。生まれたものはいずれ滅びるが、それは生命にも同じことがいえる。そして滅んでもまた、新しい生命が生まれるということをコンセプトに制作しました。生き物たちが平和に暮らしていたところに、突如おとずれる危機！果たしてちゅちゅちゅ快獣の運命は！？

プロフィール： 大阪芸術大学 音楽学科 音楽・音響デザインコース 4 回生。卒業制作を共同制作中。4 回生なのに大学に通い詰めている。制作に行き詰まったときの対処法はブラバルーン。

2. 深海の世界

龍華大吾(M15)

ギターというある程度演奏法や音の形が定まった楽器を表現のインターフェイスとして使用し、アンビエントなサウンドに深海の神秘的な美しさ、冷たさ、生命を感じさせる楽曲に仕上げました。

プロフィール： 音楽音響デザインコース 3 回生

3. DAMAGE

長谷川文彦(M15)

タイトルにある DAMAGE とは、マイクロフォンへの DAMAGE のこと。マイクロフォンにあらゆる DAMAGE を与え、それらを録音する。今回 10 つの DAMAGE をマイクロフォンに与えてみた。それらは、回す。投げる。こする。引きずる。叩く。水。掃除機。排気口。スプレー。洗う。である。

プロフィール： 大阪芸術大学、音楽学科、音楽・音響デザインコース 3 回生

4. 落ち葉

藤井紀彦(TM14)

ランダムに積み重なった、少しずつ色調の違う落ち葉のような、秋らしい電子音響を演奏したいと思います。3 つの音素材を加工して空間的に配置する作品。鮮やかな音の断片から淡いノイズまで。

プロフィール： 音楽とプログラミングが大好きです。このごろはコンピューターで即興的な演奏をすることに挑戦しています。

卒業生ゲストアーティストライブ1

大城 真 Makoto Oshiro

音を出すために自作した道具、または手を加えた既製品を使ってライブパフォーマンスを行う。またそれと平行して音や光の干渉に着目したインスタレーション作品を発表している。近年は川口貴大、矢代諭史とのユニット”夏の大△”としても活動している。

CD等のリリースに”夏の大△”(DECOY)、“Unellion/Variation”(円盤)、“Phenomenal World”(hitorri)など。

主なイベント、展覧会に”夏の大△”(大阪 梅香堂)、“Mono-beat cinema”(東京 ICC)、Multiptetap(ロンドン Cafe OTO)、Festival Bo:m(ソウル Art Space Mullae)、“Strings”(東京 space dike)、“F.Y.I”(台北 台北国際藝術村)、“Yo No Bi #2”(マンチェスター Islington Mill)など。

在校生アコースマティックコンサート1

1. 風の空間

岩田篤志(M15)

風、ウインドノイズを使った音楽。

プロフィール： 音楽学科音楽音響デザインコース 3 回生

2. 無念無想

米田侑加(M15)

人間は誰しも赤子の時は無垢であり、大きくなるにつれて喜びや悲しみなどの感情が芽生えてきます。人の声を煩悩に見立て、鐘の音により煩悩が浄化される様を表現しました。

プロフィール： 1996 年 9 月 20 日生まれ。奈良県在住。小学校からピアノを習い始め、高校では声楽を専攻していた。現在、音楽・音響デザイン 3 回生

3. 紺碧(こんぺき)

佐藤佑輔(M15)

迷いに迷ったらこのような曲になりました。迷子になっている感じを楽しんでいただけたら幸いです。

プロフィール： AD コース 3 回生

4. チル

芝本圭吾(M15)

チルれる作品。音の響きが気持ちいい作品です。1つ1つの音を聞いて頂けたらと思います。

プロフィール： 芝本圭吾です。M15022 です。今年3回になります。

5. (タイム) ライン

干場冬馬(M15)

「あなたは擬似的なコミュニティの中に浸食されて、もしかしたら孤立していることすら気づいていないのかもしれない。いや、その孤立感こそ擬似的なものなのかもしれない。」

この作品は今のあなたに向けた作品です。今ここに座っているあなたに向けた作品です。作品中の声は全て自動生成されたSNSのつぶやきです。速度もいじらず、エフェクトもかけずそのまま曲にしました。

プロフィール： 音楽学科音楽音響デザインコース3回生

6. オールドエイジ

松本隆聖(M15)

昔々を想像してつくりました。

プロフィール： 松本隆聖

7. 「奏音」(カノン)

南 里奈(M15)

作品解説：家で飼ってる12才のポメラニアン奏音から録れた音だけを使っています。吠えるといってもインターホンが鳴った時、誰かが帰ってきた時、ご飯が欲しい時など、状況によってトーンが変わるので、その些細な変化を使ってリズムカルにしました。少しでも癒されたり、プラスな気持ちが生まれれば嬉しいです。

プロフィール： 音楽音響デザインコース3回生

8. voice wave

山田晃央(M15)

イスラムの宗教歌ナーシドをモチーフに、自分の声だけを使って作品を作りました。いくつも声を重ねてできた、声のうねりを聞いてください。

プロフィール： 音楽学科、ベースボーカル

毎日 19:00～1 分間の音を毎日 iPhone でとりためたものを音源として利用しています。誰でもできることをコンセプトに iPhone で録音を行なっております。

私は 6 月に父を亡くしました。今回はその時期の音源を使用しています。何気ない日常が父の死によって非日常になる感じが伝わればいいなという思いとその場の空気感をリアルに伝えたいという思いから加工は一切していません。

途中にあるナレーションも音を聞いて思い出した情景を話し、それを一発どりで録音しています。私は父に心配をかけてばかりで親孝行なんてできませんでした。この曲はあえて葬儀の生々しさを残すとともに父のかけらを残したいと思い作曲しました。

プロフィール

音楽学科三回生。中学一年生からドラムをはじめ、大学入学時に電子音響に出会い環境音に興味を持つ。

在校生アコースマティックコンサート 2

1. 輪廻

濱中勇吾(M14)

人の一生の心拍数は約 23 億回。鼓動が終わった後、魂はどこへ逝くのか。私は輪廻を信じたい。

プロフィール： 大阪芸術大学音楽学科 4 回生。主にレコーディングを学びながら、メディアアートや電子音楽など幅広い分野へ興味を広げてきた。

2. 人工島 Waterfront

藤田直斗(M12)

人工島とは周囲が水で囲まれた陸地であり、天然ではなく人工的に作られた島のこと。この作品は、関西の人工島（大阪舞洲咲洲、神戸ポートアイランド六甲アイランド）で収録した音を使って、島の発展とその後の衰退と再開発をイメージしました。

プロフィール： 1994 年大阪府生まれ。幼少期からピアノ、エレクトーン等の音楽教育を受け、14 歳で作曲を始める。大阪芸術大学音楽学科音楽音響デザインコース 4 回生。作曲と電子音楽を上原和夫、檜垣智也の各氏に師事。2009 年に、神戸・西宮を中心に活動する音楽制作サークル「ハネサクレコーズ」に所属し、同年 8 月にメンバーと共にコンピレーションアルバム「ハネサクレコーズ(仮)」をリリース。現在、学生主催イベントでのクラブ DJ 等、幅広く活躍している。

3. Oscillation

遠藤彰真(M15)

この作品は、低音のみで構成された音声ファイルです。この楽曲データは、「楽曲」であると同時に「楽器」にもなります。この音源はウーファーのみで再生できるよう、500Hz 以下のみの音源としています。低音により、それが再生された環境にあるものすべてに振動を与え、それによって音を発生させ、発生した音がこの楽曲の一部となります。再生される環境によって、音が大きく変わる楽曲ということになります。低音自体にも表情をつけており、そのテーマは「心臓」です。あらゆる物体が、その空間にあるこの曲＝つまり「心臓」の動きに合わせて、振動して音を出すような空間表現をすることから、楽曲名を「発振」という意味で「Oscillation」と名付けました。

プロフィール： 大阪芸術大学 音楽学科 M15011

4. in a landscape

岩熊恵子(TM14)

スタジオ録音した声、弦楽器、小物類を用いて制作。単音のバイオリンの音を重ね、エフェクトをかけて歪ませることでロックギターのような轟音を作り、その中で聴こえてくる素朴な歌声を印象的に表現した。

プロフィール： 1976 年福岡県生。福岡女子短期大学音楽科総合音楽課程シンセサイザーコース卒。現在、大阪芸術大学通信教育部音楽学科在学中。

5. Jackson Pollock によせて

新美 術(TM13)

20 世紀アメリカの抽象表現主義の代表的な画家として知られる、Jackson Pollock の絵画をスキャンし、MAX/MSP にて R.G.B.それぞれにノート No.に対応させて発音するサウンド・インスタレーションを素材として、発表用に再構成した作品。彼の生きた 20 世紀を Constraction(Scrap & Build)の世紀とし、槌音高く響く杭打ち機の音に合わせて、アナログ・シンセやミニ・テルミンの音色やレスリー・スピーカーで、前世紀的ノスタルジーを表現してみた。

プロフィール： 大芸通教にて電子音響音楽に出会い、その奥の深さを「限りない可能性」と脈絡変換し作品の制作を続けている。今回のプログラムを新しい楽器の創造と捉え、その演奏方法の習熟に努めると共に、偶然性に支配される音楽を、いかに作品として定着させるか?を模索中。

6. 『夢説明』

堀尾麻菜美(M15)

初めて言葉が入った電子音楽作品を制作しました。この作品はタイトル通りで、夢についての説明を作品が言葉で解説してくれています。なかなか言葉に合う音が見つからず、苦労しましたが、なるべく言葉からイメージできるような音になるよう努力はしました。

プロフィール： 2015 年 大阪芸術大学 音楽学科入学。趣味はゲームです！！好物はカレーです！！以上です！！よろしくお願いします！！

7. 点と線のインテンション

宮本飛鳥(M15)

点と線で描かれた言葉。声はたった一つの音で紡ぐことが出来る。些細な感情も、動作も、言い方を変えればきっと特別に聞こえるはず。答え合わせは手元の機械で。

プロフィール： 音楽学科 3 回生。民族音楽が好き、トマトは少し苦手。山より海派。愛用のスピーカーは YAMAHA。

8. 誰が為に鐘は鳴る（アコースマティックバージョン）

田代啓希(M14)

「For whom the bell tolls; it tolls for thee.」

17 世紀のイギリスの詩人 John Donne の説教の一節「For Whom the Bell Tolls」から着想を得て制作した作品。今回の秋の電子音響祭で同じ名前の曲があるが、こちらはアコースマティック作品としてアコースモニウムで上演する。

プロフィール： 1995 年神戸生まれ。大阪芸術大学音楽学科音楽・音響デザインコース在学中。主に電子音響音楽の作曲を行い、モジュラーシンセとアナログメディアを取り入れた作品の制作と演奏も行なっている。これまでに秋の電子音響祭(2016 大阪芸術大学)、Contemporary Computer Music Concert(2016,2017 東京)、Musiques à réaction 8.3 - Supermarket of Sounds(2017 パリ地方音楽院)、INTAC(2017 大阪)などで作品を上演。コンプリート・ジョン・ケージ・ヴァリエーションズ (2016 東京)にて John Cage 《Variations I-VIII》全曲日本初演奏参加。FUTURA2017 アコースモニウム講習会参加。電子音響音楽を檜垣智也、音響技術を宇都宮泰に師事。

在校生ライブパフォーマンス 2

1. Anthem ～ Get Rising

我喜屋 勇(M16)

どちらも同期を流して演奏します。

プロフィール： 大雅が所属しているバンド、Stray Little Cats が活動休止になったことをきっかけに、一度セッションをしたいと思っていた我喜屋勇、勇者 ショゴに声をかけたのが結成のきっかけとなる。そして、大雅の紹介により元 Marble Cat のコンポーザー 坂口が加入、しばらくはボーカル不在のまま何度かのセッションを繰り返していた。そしてボーカリストを探っていた大雅が新歓で見つけたおだえみに興味を持ち始めメンバーと共にスタジオへ足を運んだ結果、彼女のライブパフォーマンスに惚れ込み、スタジオ終了後本格的に交渉。こういった経路を辿って 5 人揃い、2018 年に 1st アルバムをリリース。以後、BEA presents F-X に出演し同年 5 月 29 日から千葉 LOOK を皮切りに「PARALLEL LIVES TOUR」をスタート。そして 7 月にワンマンツアーを実施した後に、ROCK IN JAPAN FESTIVAL・SUMMER SONIC・FUJI ROCK・RUSH BALL・Japan Jam・VIVA LA ROCK といった大型ロック・フェスティバルに出演、、、の予定。

2. ブレイブインワンダーランド

坂本祐一(M17)

「なにひとつない昼 いつもなんかと違う不思議な世界に落ちた」
不思議の国に転落したアリスの冒険をそのまま曲に致しました！ステキでやば〜いワンダーランドの道
マッドハッターの愉快なお茶会 物騒な女王の大裁判 はたまた超危険な大怪獣との戦闘など ルナティ
ックでインサニティな不思議の国をお楽しみください！

おしながき

「なにひとつないひる」 「ウェルカム トゥ ワンダーランド」 「ワンダーランドを往く」
「インサニティインサニティポーカーフェイス」 「ハートの大裁判」 「凶兆」
「怪物ジャバウォック」 「ルナティックルナティックワンダーブレイブ」
のメドレーとなっております。
ゲーム音楽が好きな方 音ゲー楽曲が好きな方にオススメです！

プロフィール： 1998 年生まれ。“とりきのこ” 名義で活動中。ゲーム音楽が好きで 中学 3 年あたりか
ら独学で作曲を開始。曲の世界観や風景が見えてくるという強みを持っているとよく言われます。今で
は型にはまらない楽曲作りをし、さらに楽曲の質を底上げしようと奮闘しております。まだまだ未熟で
すがよろしくお願い致します。

3. タイトル未定

林 龍爾(M13)

4. 誰が為に鐘は鳴る（ライブバージョン）

田代啓希(M14)

こちらはライブ作品としてシンセサイザーなどを用いて **Remix** を行う。

*主な作品解説、プロフィールは“在校生アコースマティック 2”の 8 をご覧下さい。

卒業生ゲストアーティストライブ2

安井麻人 Asato Yasui

大阪府出身。幼少期より鍵盤楽器に触れる。1984 年にテクノバンド “A.C.E.” を結成。CD『エレクトロン』（FALL RECORDS）を始め、オムニバスへの参加や提供楽曲など多数。一方音そのものに注目し、動きによって発する音を伴う立体作品を制作。後に展示活動も行う。サウンドアーティストとして美術館やギャラリーなどで多くの現代音楽家、現代美術家らとも共演。音楽と美術の狭間を行き来する活動を行っている。またファッションショーの音楽制作をはじめ、CM などの商業音楽を手掛けるかわら、アーティストのプロデュースやサポートも行うことも多い。音楽教育機関で教鞭も取る。大阪芸術大学音楽学科卒業後、武庫川女子大学大学院修士課程を修了。音楽図書室フォノテーク会員。

LIZ HELMAN (イギリス／1961)

DAYLIGHT DREAMING (2017) - 5'21

作品解説：

The work consists of processed and manipulated sounds and field recordings constructing an evocative, textured composition that is both spatial and mesmeric; part drone, part glitch, rhythms rotate with randomness and repetition; the invitation is to another world, one that perhaps we have already visited in real life, or exists in our head, as the title suggests.

プロフィール：

Liz Helman is an artist working in time-based media, which includes sound. She is London based, self-taught and with no formal training as a composer.

As a multi-disciplinary, Liz has always had an interest in ambient music and sound art as a form of expression. Her work, both visual and sonic, is a response to place and environment. Sensitive to how these energies make her feel, she is interested in the subliminal and sonic exploration of these experiences. By walking the streets, and experiencing different levels of sounds, layers and textures she always begins her process with field recordings before studio intervention. She very much likes working experimentally, following the thread of the sound to its ultimate destination, which she likes to think of as sonic alchemy.

She signed to Kohlenstoff Records, a Montreal-based label and arts-collective in 2015. Sound pieces have been heard at New York City Electroacoustic Music Festival 2014 and video works have been shown in London and abroad including: MUSLAB Festival, Mexico, 2014; Millenium Film Workshop, New York, 2014; LAB Film Festival at Hackney Wicked, London 2014; Bermuda Triangle Test Engineers benefit for Resonance FM, 2014; LOOP Video Festival, Barcelona 2011; Lesbian & Gay Film Festival, part of festival shorts with Barbara Hammer, BFI, London, 2011; FrinGe Film Fest 2011; Wunderland at tactileBosch, Cardiff 2011; Supermarket Stockholm Art Fair 2011; Whitechapel Gallery Open Screenings, 2010; Rich Mix Cultural Centre, London, UK, 10; Counted Weekend Festival, Roundhouse, London, 2010; Portobello Film Festival 2008; Visions in the Nunnery, Bow Arts Trust 2008; WAVE [Hybridity, Identity & the Self] – Ewha Arts Center, M-Post Gallery, Seoul, Korea, 2006.

Eduardo Abrantes (ポルトガル／1979)

Sister Brother Agatha Darkness

- #4 in "Some Days Series" - a series of short situated sound experiments - (2016) - 14'44

作品解説：

Faux-goth sensibilities fractured by 4am introspection. Sister Brother Agatha Darkness moves between dense social atmospheres and the off-beat suspenseful instinct for interruption. As a sound body it lurks, ritually gasping in tangible shyness and awkward self-awareness, while basking in cinematic associations. Composed of live electronics, sample manipulation and processed original field-recordings, it is about subtle exhibitionism and wearing proudly one's garland of imperfections.

プロフィール：

Eduardo Abrantes (b. 1979 in Lisbon, Portugal) is an artistic researcher, sound artist and filmmaker involved with phenomenology of sound, site-specific performative strategies and exploration of embodiment in relation to creative practices.

In January 2016 he concluded a joint PhD (Södertörns Högskola/Københavns Universitet/ Universidade Nova de Lisboa) titled "Voice and Presence", and dealing with the notion of the human voice framed as a philosophical problem, the acoustics of the extended body in space and an intersubjective interpretation of the concept of sonic territories.

Currently based in Copenhagen, Denmark, his recent practice has focused on the exploration of the dynamic crossing between sound and embodiment, mostly in the context of how everyday experience is enacted and brought into a heightened awareness through performative practice and strategies.

作品解説：

The idea with this composition was to create a rhythmic pattern that slowly gets torn apart into a more hectic and stumbling beat. I always thought this track would suit for abstract continuous

プロフィール：

I've been working in the field of abstract electronic music composition for almost a decade and I'm a educated sound designer from University College South Denmark. I'm currently exploring the depths and boundaries working with hardware synthesizers and samplers. I also use computers when I write algorithmic music for installations and so. My music is inspired by old works of Musique-Concrete composers as well as ambient, idm, techno and other hypnotic forms of electronic music.

ATLAS OF UNCERTAINTY (2017) - 3'38

作品解説 :

This piece is a sonic continuum ranging from unaltered natural sounds to entirely new sounds - or, more poetically -- from the real world to the realm of the imagination.

"Atlas of Uncertainty" is an electronic music piece in which a microcosm of sounds, explored through some csound interfaces, becomes the hyletic universe of the work.

Heterogeneous sound materials are explored through various techniques (granular, subtractive, additive):

- Kitchen noises; Dog screams; flute jet sounds;
- Treated bells texture;
- Electronic generated whips sounds and Granular accumulation, Noisy whooshes ;
- Chimes;
- Tibetan bowls;

just to name a few. The sounds are here combined in well-identifiable electronic gestures.

Massimo Vito Avantaggiato is a composer and multimedia artist.

For him, music and art are a medium through which the inner spiritual essence of all things is revealed and shared.

He took a degree in Electroacoustic Composition with full marks at "Giuseppe Verdi" Conservatoire in Milan and a degree as a Sound Engineer. He has also studied composition in the same conservatory. Finalist in some composition competition, He has recently participated in: Segnali 2017; Giordano National Composition Contest 2014 (third place), Conservatorio di Foggia, Italy; EMUFEST 2016 (Rome, Italy; Nycemf 2016-2017; Rieti Elettroacustica 2016, Rieti, Italy; Csound Conference 2016, Maynooth University (ireland); V Cycle du son - Image & Resonance, Mar del Plata, Argentina; Labirinti sonori 2016, Parma, Italy; Art and Science days 2016, Bourges, France; Diffrazioni Festival 2016 (Florence, italy); ISSTA 2016 -2017, Ireland; NAISA 2016 (Toronto, Canada); SMC 2016 (Hamburg, Germany)

Kurakake 1 (2016) - 10'56

作品解説：

In 2016/17, I composed 'Kurakake Trilogy', that is comprised of 3 short acousmatic pieces (Kurakake 1, 2 and 3)

Kurakake is the name of a mountain that appears prominently in the works of a poet Kenji Miyazawa (1896-1933), and it became the primary inspiration for this composition.

Douglas McCausland (アメリカ／1990)

Glossolalia (2017) - 8'22

作品解説：

Late one night in early January 2017, I found myself recording demo material with a circuit-bent radio I had just completed construction on. After some time spent working on 'finding sounds', I flipped from the FM band to AM. In doing so, I came face-to-face with broadcast of the most hate-fueled and vitriolic kinds of radio: misogynistic speech and denigration of basic human rights, anti-immigrant standards and racial hate. I was struck by how in this context, even statements that seemed at first innocuous can take on new sinister meanings due to their proximity to such outlandish and openly hateful rhetoric. I chose to try and take this hateful language and turn it "inside out", to transform it in ways that would render its syntax broken and bring its semiotic subtext up to the level of its surface content while still leaving the piece open to some degree of interpretation.

プロフィール :

Douglas McCausland (b. 1990) is a composer / performer of electroacoustic and instrumental music currently based out of Lansing, MI. He studied with Mark Sullivan, Lyn Goeringer, Alexis Bacon, and Ricardo Lorenz before completing his MM in composition at Michigan State University in May 2017. Beginning in September of 2017, Doug will begin further graduate studies in digital composition and performance at the University of Edinburgh, in Scotland. In his work, he strives to explore new sonic territories and processes for creating music, and to ultimately create works that are relatable through a focus on introspective understanding, social commentary, and common human experience. Musically, he has focused in recent years almost exclusively on the creation of electronic music for interactive systems and performers, fixed-media, and recently for created 'instruments' and real-time processing. Doug is additionally an active guitarist and electronics performer, advocate for new music, music educator, and a microbrewery enthusiast.

Riccardo Culeddu / Davide Sardo (イタリア／1973)

Anna's Lightness (2015) - 10'04

作品解説 :

"Anna's Lightness" is a minimal composition based on a web of interweaving guitars and a rhythmic grid of prepared piano. On this structure, a bass, a digitally transformed voice and another guitar with e-bow appear and disappear as monochrome brushstrokes. The music is inspired by a Burnett Newman painting, "Anna's Light": three red panels that scan the space in a static and vibrant way. "Anna's Lightness", on the other hand, divides the time in a similar way, inviting the listener to perceive music not as a linear narrative, but as a series of still pictures on which light plays.

プロフィール :

Riccardo Culeddu, born on July 6, 1973 in Treviso (Italy), studied guitar and graduated at the Conservatory of Florence. He works as a guitar teacher, writes electronic and electroacoustic music and also collaborates as an editor of musicological texts.

Davide Sardo, born on April 26, 1973 in Cagliari (Italy), studied double bass. Beyond doing sound design for theatre and movies he also writes electronic and electroacoustic music and works as a record producer.

Tâches (2016) - 7'20

作品解説：

Tâches (2016) is an electroacoustic work that tries to represent the routine of a person who performs different types of manual tasks. For this reason, most of the recorded material come from electric tools such as: drills, saws and sanders.

At the beginning of Tâches, granulated and saturated materials with complex and contrapuntistic gestures are perceived. Opposite to this, sounds like water and tea kettle are used to portray the moments of lower tension which represents the moments when the person rests. These materials are continuous with homogenous sonority. At the end, samples are saturated remarkably and the texture is even more complex than the beginning.

Che-toi (2016) - 8'15

作品解説：

Che-toi (2016) is an electroacoustic work inspired in the French and Argentinian culture. This is represented with the use of monosyllabic words like che, no, toi, moi, temp, etc. Moreover, there are quotes and fragments of French Baroque music and Argentinian tango. There are also referential sounds of instruments such as bandoneon and accordion which interact with more abstract materials.

Tom dice que el amor verdadero espera [Spanish to "Tom says that true love waits"] (2015) - 4'04

作品解説 :

This electroacoustic piece alludes to a particular way of time perception: "the waiting". It is an invitation to contemplate the gradual changes of global timbre in a structure of repetitions and dilations of the sound sources, which were mainly created from a process of "digital hacking" known as data bending. Other sounds were taken from live improvisation and experimentation sessions.

Pierre Clemens (ベルギー／1970)

Oostende17 - 10'04

プロフィール :

Pierre Clemens is a self-taught composer and performer of his own music. Already at the age of thirteen he started some experiments with tapes recordings. But it's only after his studies at the Royal Academy of Fine Arts of Brussels that he deepened his sound research by mixing tape recordings with electro-acoustic compositions. He tried to fuse both to create some very special universes which never repeat. Self-taught in the acoustic field, he tries to approach our present musical univers with a genuine perception. He is also willing to build links between his sound creations and his visual artworks (drawings, paintings and videos) This research is today still going on. The soundspace is to him like an echo related to landscape image creation. This landscape is not an oppressing reality, because it comes from a very intimate part of ourself. The landscape is a mental image of our soul. The tension between the microscopic world and the infinite space is at work in these electro-acoustic compositions.

Alexander Sigman (アメリカ／1980)

フロー_remix (2017) - 6'06

作品解説 :

フロー (2017), scored for voice, guitar, and live electronics (projected via small tactile transducers into the guitar), uses as its source material the score and various recordings of John Dowland's 1600 lute song "Flow, My Tears," as well as computer voice renditions of the song's text, "translated" into Japanese via Google Translate. In the electronics, the computer voices, as well as zither, koto, waterphone, and fire organ samples, are mapped to the recordings of the Dowland via concatenative synthesis techniques.

フロー__remix derives its sound elements from the electronics of the voice and guitar duo. Whereas the projection space of the electronics is compressed and the sound quality compromised by the guitar-mounted transducers, and the sound levels governed by guitar output, in the duo, the audio materials are situated in a binaural spherical (head) model in the remix.

Alexander Sigman's award-winning instrumental, electroacoustic, multimedia, and installation works have been featured on major international festivals, exhibitions, institutions, and venues across Europe, Asia, Australia, and North America. In June 2007, Sigman was Composer-in-Residence at the Musiques Démesurées festival in Clermont-Ferrand, France. Subsequently, he was awarded residency fellowships by the Akademie Schloss Solitude (Stuttgart, Germany), the Djerassi Foundation, the Paul Dresher Ensemble Artists Residency Center, and Gullkistan (Laugarvatn, Iceland). In 2013-2014, he undertook a musical research residency at IRCAM. He is currently Associate Professor and Chair of the Music program at the International College of Liberal Arts (iCLA) of Yamanashi Gakuin University in Kofu, Japan.

SGUARDO SOSPESO, Transizione (2014) - 8'06

作品解説：

The composition (acousmatic) is described in 8 minutes (the time it takes for a solar ray to reach the Earth) almost an imperceptible transition from dark to light, with an expansion, a slowdown of the unusual process of perception-listening. The dark and the light, like any phenomenon, are a set of transitory elements related to each other, with cycles of expansion and contraction.

The composition is based on the spectrogram of an audio sample from the NASA, SDO (Solar Dynamics Observatory), a space telescope launched on February 11, 2010 to study the sun. The global sample rate which is equal to 67.02 Hz.

Two items of work, consist in following in an ascending way the exact sequence of natural harmonics of the sample arrived in tonal quality concrete of the sun. Each of these frequencies became, then, a keynote of themselves weaving a dense polyphony.

Paolo Pastorino (イタリア/1983)

Spazio residual (2017) - 3'04

作品解説 :

The term "residuale" comes from Latin residuum, it means something that remain. The residue is what is left, what remains by any kind of operations or processes of transformation.

Residual space is a waiting space, trapped in a time-suspended state. Among the processes that lead to its formation and those who reintroduce it into the circuit of planned urban mechanisms, the residual space will be characterized by its own temporality, which goes beyond those imposed by any kind of planning. It no longer follows the rhythms and times of metropolitan and social dynamics, but the flow of time takes on other rhythms that are first of all belong to nature.

Loïse Bulot (フランス／1982)

Yami (2017) - 11'28

作品解説：

I composed this piece on the evocation of a nocturnal landscape, water and stars.

On ascending and descending wave movements, the piece develops into a first part where I have assembled fragments - from the drop of water to the current - and in a second part evoking the reflections, from lunar light to sunlight .

プロフィール：

Loïse Bulot builds a dreamy world through drawing and music. After have studied graphic arts in Paris, she entered to the School of Fine Arts in Marseille and developed a work of drawing, then installations of shadows and light inspired by the pre-cinema. Her work is moving gradually towards finding a meeting between visual and sound. She continued her studies at the Conservatoire Pierre Barbizet of Marseille in the electroacoustic composition class. She composes now acousmatic and mixed music in collaboration with several musicians, conducts live performance projects with drawing and experimental music, and develops participatives works, in a will to interact between her various practices. Winner of the Luigi Russolo Prize in 2014 and the Banc d'essai (GRM) competition in 2015, her musical work has been presented at various festivals in France (Futura, Revox, Les Musiques, Multiphonies) and abroad (Germany, Mexico , Canada, Spain).

Andrea Guterres (オーストラリア／1991)

Solipsistic Slumber (2017) - 7:58

作品解説：

Solipsistic Slumber is an exploration of consciousness. The music aims to offer alternative perspectives to reality by warping and reversing sounds from our environment. It also seeks to mimic natural sounds by using computer programming, hence bridging the gap between the 'natural' and the 'artificial.'

The music consists of a mixture of recorded sounds, recorded music, and electronic interpretation of sounds from our natural environment. Sounds that have been recorded and manipulated in this piece include birds, footsteps, bells and the Weddell seal.

However, the piece does not claim to represent the natural environment exclusively. Some electronic instruments used have also been designed to incorporate more unnatural sounds, or mimic acoustic instruments (such as the flute) with an electronic interpretation. The result is a harmony between the natural and artificial.

プロフィール :

Andrea Guterres graduated from the Sydney Conservatorium of Music in 2015. Specialising in electroacoustic art music and chamber music, her works have been premiered and recorded by principal ensembles, and herself, at iconic venues, concert halls, events, artist residencies and festivals throughout Australia, Germany, Italy, Morocco, and the UK. Since her expedition to Berlin with an artist visa, Andrea has written for and performed at art music events (at Loophole and Greenhouse Gallery), dance shows, and professional chamber ensembles (including a commission by Dolce Ombre recorder quartet and Passepartout Duo. She is the composer, sound designer and curator of 'Hood', a new contemporary dance duet scheduled to debut in London this August. Her work for Berlin-based duo Chaim Gebber has been invited to be performed in South Korea and China in August and September, respectively.

Nikhil Singh (b. 1994) is an Indian composer, audio producer/engineer, and developer of musical software. His work variously explores the role of traditional compositional techniques in modern music, the tools and sounds of electronic music, and the ways in which new technologies can lend themselves to artistic practice. Nikhil is a recent graduate of the Berklee College of Music, where he was a scholarship student and his mentors included Dr. Richard Boulanger in computer music and software development, Marti Epstein and Gabriele Vanoni in composition, Jeff Baust in electronic composition and production, and Neil Leonard in interdisciplinary and audiovisual art. While at Berklee, Nikhil received the Max Mathews award for computer music and the Earle Brown award for composition.

Distant Shores - for theremin, voice and loopstation (2016) - 7'24

作品解説：

Distant Shores for theremin, voice and loop station was written after a long walk on the Dutch beach. While walking on the sand, listening to the water reaching the shores and hearing the screams of the seagulls I was pondering about distant countries on the other side of the water. This turned out to be the inspiration of my composition. The big range and haunting sound of the theremin in combination with the human voice and all the sounds including the ocean and the seagulls are looped live during every performance of this composition.

Here is the visual version of my piece: <https://www.youtube.com/watch?v=6QKley2AMec>

Popolazione XIV (2017) - 11'46

作品解説：

Popolazione XIV is an acousmatic work that I composed starting from the concepts of genetic evolution and natural selection. My main objective in composing was to characterize the work in an evolving structure that wants to simulate the genetic progress of different populations in a given environment.

The structure was built following the principle of the genetic algorithm, which allows to evaluate starting solutions to create new ones after recombining the initial factors and introducing new pseudo-casual elements.

This algorithm mathematically simulates the natural selection system and it is with this simulation that I wanted to set the sound evolution of the work.

All the sounds of the work derive from a single sound element, it is a few seconds instrumental phrase played by an instrument of Chinese tradition called sheng, I digitally processed this single sound material to achieve a coherent evolutionary process.

Matteo Tundo was born in Potenza on 08/21/1992. In 2010 he was admitted to the course of Classical Guitar with Michele Greci in the Conservatory "Gesualdo da Venosa " in Potenza. Awful Vegetables (2007) - 4'02

作品解説：

Awful Vegetables is a humorous composition, which purports to be Electronic Voice Phenomena (EVP), voices or sounds detected in recorded media that are unexplained by known physical principles. My notes imagine that I found this recording recently in my grandmother's attic, a found recording made on my families Wollensak reel-to-reel tape desk of my sister and me talking about vegetables. The tape has become a sort of pentimento with various generations of half-erased recordings blending together; 'printing-through' is the technical term. Or, perhaps something more incorporeal and ghostly has happened because these things were put in prolonged physical proximity and catalyzed by memories of my childhood.

プロフィール：

Matt Malsky's compositional style is characterized by its rhythmic vitality and dramatically crafted gestures, and has been described as economical, eloquent, intellectually rigorous, and emotional compelling. His virtuosic works for acoustic instruments with live computer processing have attracted the interest of outstanding soloists including John Bruce Yeh (Chicago Symphony Orchestra), Esther Lamneck (NYU), Frank Cox (c-squared), Seth Josel and Isabel Ettenauer. The Penderecki String Quartet commissioned his second string quartet, Lacan. His third quartet, Berlin, Symphony of a Great City is an accompaniment to that classic silent film. Together with his first string quartet, these have been released on compact disc through the Centaur label. His recent chamber music, an aural map of emotions, is available on Ravello Records as GEOGRAPHIES & GEOMETRIES with the Radius Ensemble and the Worcester Chamber Music Society. He is Dean of the College at Clark University, Worcester (MA USA).

Wong Cyun (黃泉) (2017) - 5'30

作品解説 :

Wong Cyun (黃泉) is the Chinese (also Japanese kanji) word literally means Yellow Spring. In the East Asian cultural sphere, it means the land of the dead (World of Darkness).

It is believed that after we die, our spirit will send to the Wong Cyun and put to the judgement before we go to the next life. First of all, we need to pass through the gate of ghost to the Wong Cyun path (黃泉路). It is an endless and very rough path, we can't even see the end of the path. The burning red flowers Lycoris radiate (曼珠沙華) throughout the path, they make the path seems to be covered by the carpet of blood. Also, it seems like the path is lighting by the fire; hence, this path also calls The Path lighting by fire (火照之路). These flowers have the magic aroma, it will make us remember all the thing has happened in the past life and the present life, we can review our life regardless both bitter or sweet memories.

After the Wong Cyun path, we are arriving the bridge over the river of forgetfulness (忘川河). We need to drink up the Five-Flavored Tea of Forgetfulness over there in order to forget all the things in our life before we go across the bridge. Finally, we will go through the bridge for the judgment, then go the next life with the emptiness.

作品解説：

"The Starry Night" is a 12-minute electroacoustic composition, heavily inspired by Vincent Van Gogh's life and work. The piece was completed in 2015, which was declared the "Van Gogh Year", celebrating 125 years of inspiration after Van Gogh's death. "The Starry Night" is in essence a musical interpretation from Van Gogh's like-named masterpiece, completed in 1889. Moreover, this piece attempts to capture the essence of the great painter himself.

Viel Virginie (フランス／1985)

Uni-vers(e) (2016) - 10'22

作品解説 :

Uni-vers(e) is an acousmatic piece that immerses the listener in an ambivalent world, between fragility and determination. The form of the piece illustrates the start and the evolution of a relationship between two individuals, a mix of joy and torment. The concepts of duality and contrast are omnipresent within Uni-vers(e). This can be observed spectrally with the heaviness of the percussions and the lightness of the grains. One can also perceive a morphological duality regarding the excitement of the iterations and the fluidity of the harmonic profiles. The spatial composition opposes large spatial trajectories to the inertia of various sounds.

Uni-vers(e) is part of my thesis' s portfolio which questions the relationships between visual composition and acousmatic composition.

This piece is a stereo version of a piece originally composed for a dome of speakers. It has been composed during a residency in the studios of the Université de Montréal (CA), composed in response to an invitation from R. Normandeau.

プロフィール :

Virginie is a composer of electroacoustic music.

She started her career as visual artist, before composing electroacoustic music. Since 2014, she is a researcher at De Montfort University (UK). Her research, supervised by John Young, investigates the relationships between acousmatic composition and visual arts. Her research allows her to work in Montréal with Robert Normandeau. In Spring 2016, she was invited to compose a dome piece at the Université de Montréal, Quebec, Canada and has been supported by the Graduate School Travel Award of De Montfort University and MTI Student Research funding. Between Oct.2016 and Jan.2017, she has completed a research project at the Ionian University, in Corfu, Greece. It was by supervised by T.Lotis and received the support of Erasmus+. In September, she will in residence at Visby International Centre for Composers (Sweden). Her pieces have been played in Europe, North America and Australia. 'El caminante y su sombra' (The Wanderer and his Shadow) (2017) - 4'46

作品解説 :

'El caminante y su sombra' is an acousmatic composition made from different field recordings taken around México City's periphery ensembled on a digital stereo track.

The soundwork takes the title from Friedrich Nietzsche's book 'The wanderer and his shadow' where the philosopher takes his reflects about the moral structure and human history to explain some mistakes of the modern society. The book opens with a conversation between, as –the title says– a wanderer and his shadow, both been in agreement about the great oportunity they have right now to talk as they never do it.

The content of this soundwork presents a perpetual dialogue since an elemental way to move: walk. What reveals the sound of walking on concrete, ground, over grass, etc. from a place? It's not only the walking itself but the sonic phenomena around that matters.

作品解説：

Stereo version of a 16-channel remix of the Rondo Allegretto of Cambinis' Flute Quartet in D-Maj. The original was sampled as a whole, heavily gated and transformed with a Granular Delay. The resulting files were manipulated by several Pure Data patches. The Original Rondo was analysed and structurally rebuilt in slightly stretched form using the updated sounds. A heavy shift in tone was achieved, the original sweetness now being replaced by a rather physical, proprioceptive quality, a state of restless instabilty and stumbling movement.

作品解説 :

This piece follows on from previous work on the theme of representing auditory hallucinations and impairments. Whilst there is much hearsay, little research exists on the immediate and short-term effects of alcohol consumption on the human auditory system. This composition integrates findings of a study by Upile et al. (2007), gradually introducing attenuation and distortion over the course of an abridged binge drinking session.

Stuart Cunningham is an academic who works at Wrexham Glyndŵr University in North Wales, UK. He has interests in person-centred approaches to sound design and ways in which biofeedback sensors from humans can be analysed to determine their emotional states. To date, his work has been predominantly technical and scientifically driven, but he has recently been producing creative works such as music, sound and images, in relation to these fascinations. In a recent period of collaborative research, these artistic outputs have been focused upon altered states of consciousness and how such hard-to-document, personal experiences might be represented to a wider audience in an accurate and effective way.

作品解説：

The concept for this work appeared through all the questions I got when I met the workers on their way home from factories. I was born in a small town away from the city, but I went to study and work in Hanoi for years. Every time when I travel back to my hometown, I accidentally see many workers with haggard faces and exhausted bodies. Thus I wondered that since 1986, the Vietnamese Government started the industrialization and modernization in many aspects of the cities but what did they bring back to the workers in those industrial zones in particularly and to people in general? Why do workers choose this tired work? Is it worth their time and does it help to improve? Are they really happy with that? Because of these thoughts, I decided to go to one of the biggest industrial zones in the South of the country.

STILL LIFE (2012) - 9'00

作品解説 :

A Cellular Automata can be considered a film that is generated by itself, capable of representing and shaping a wide range of self-organized phenomena. It is a collection of cells which, on the basis of simple mathematical rules, can live, die or multiply. Still Life (literally and ironically "nature morte") refers to the most famous of Cellular Automata: The Game of Life invented by mathematician John H. Conway. The piece suggests an image so far from the nature: the aim is not to have a slavishly sonification of the cells which drive the world of Life, rather than convey an image that pushes life to life itself. Recognize, through an exploration of the sound space, forms and movements that are in our body, our thoughts, our habitat, in order to resonate with the one's self.

プロフィール :

Cesare Saldicco is graduated in piano, electroacoustic music and composition. For his artistic development have been very important his encounters with A. Hultqvist, O. Lützow-Holm, P. Hurel, U. Chin, O. Strasnoy, H. Lachenmann, G. Bryars, S. Sciarrino S. Gervasoni and Ivan Fedele, with whom he obtains the alto perfezionamento diploma in Composition at the Accademia Nazionale di S. Cecilia in Rome.

Winner of several scholarships he has been awarded in important composition competitions such as Bourges, EmuFest, Destellos and Música Viva Portugal. "La Biennale di Venezia" invited him to produce a new electroacoustic work staged during the 56th edition in 2012.

His music is edited and published by ArsPublica and Sconfinarte and have been performed in Italy, Australia, Austria, Argentina, Belgium, Bulgaria, Canada, Chile, Denmark, Finland, France, Germany, Greece, Malta, Portugal, Russia, Spain, Sweden, Switzerland, U.K. and U.S.A.

Starting from 2012 he is part of MoA, a group of composers who develops site-specific projects.

Currently he teaches performance and interpretation of electroacoustic music at the Lecce conservatoire.

Elevator (2015) - 7'04

作品解説 :

ELEVATOR

Composition "Elevator" is based on 3 take recordings of elevator's movement:

-2 takes (from the interior of the elevator) recorded sounds produced by elevator going up and down for 7 floors

-1 take recorded sounds in the elevator's machine room

Recorded sounds are structurally layered and have different spatial positioning. The rhythmic elements are arranged mostly symmetrically with the polyrhythmic variations. Spectral editing and combination of selected resonating frequencies gives tonal character and opportunity to build chordal structure.

ELEVATOR – THE STORY

Elevator traveling starts as awakening from a beautiful dream. Sudden intrusion of imaginary and unpredictable characters transforms dream into nightmare. Going up and down symbolizes ups and downs in our life, and many floor stops as crossroads in real life and difficulties in making decision for our final destination. Polyrhythmic structure (4/4 vs 5/4) represents hesitancy to continue traveling (dreaming) or to exit (waking up) the elevator. In a very few moments, elevator shows its artificial intelligence and ability to make decisions on its own, as sometimes in real life, direction where the things are going are not up to us. Finally, travel ends on a pleasant and desired place... or maybe not.

Susurrus (2017) - 8'07

作品解説 :

Susurrus was originally a solo harp piece, hence the diatonic harmonies of the main part. This electronic version adds several atmospheric lines, plus a very slow melody that outlines the original harp pedal changes. A five-voice canon begins in rhythmic unison, the parts at slightly different tempi spreading slowly, then contracting again to merge together by the end. This stereo recording is included on my fourth album, Circuits Minimus. A quadraphonic mix is also available.

プロフィール :

John Melcher has spent most of his creative life outside the "New Music" world, instead following the examples of maverick American composers Charles Ives and Conlon Nancarrow, writing in his free time while working within the music technology industry. Using computers as a primary composition and performance tool since 1980 has enabled him to develop a body of work that is rhythmically complex, sometimes unplayable by humans, and infused with his interest in the mathematics of dynamical systems and chaos. Upon business retirement, he began releasing albums of his work, using a computerized virtual orchestra occasionally augmented with human performers. Born in Indianapolis, USA, Melcher studied privately with Thomas Bricetti, with Vincent Persichetti at The Juilliard School, and with Michael Czajkowski at the Buchla synthesizer-based Composer's Workshop at NYU. He lives in Bangkok, Thailand.

In this track I try to fuse tune sine waves with cuts of a recorded voice. I was looking to make a very transparent and clean track where the two elements melts as if they where one.

Anna Arkushyna (ウクライナ／1989)

ihearyou (2017) - 10'27

作品解説：

To hear the voices - to recognize the intonations - to make the melodies und textures. I put the listener in the different situations, in which the voices are too close or too far (spatial contrast); when they have different emotional aspects (contrast of mood); and when they finally do reproduce or do not reproduce some semantic information. There is one more type of contrast: synthetic material as a buffer zone between beforementioned situations and also driving force of the whole piece.

Night study 2 (2016) - 9'44

作品解説：

'Oh, night more lovely than the dawn...' (John of the Cross)

This piece was conceived as a sonic journey through real and imaginary nocturnal landscapes using as a timbral framework the wide palette of percussive and tonal sounds of a Javanese gamelan orchestra. Various kinds of recordings of individual gamelan percussion instruments were used as a basis to develop an organic sonic framework where natural and synthesised sounds were blended and contrasted with nocturnal wildlife field recordings carried out in Chile, Mexico and England. This piece was composed during a residency at the Mexican Centre for Music and Sound Arts (CMMAS) and received the first place at the 2016 Citta di Udine Composition Competition in Italy.

Felipe studied composition at the University of York in England with Ambrose Field and Roger Marsh focusing in electroacoustic composition and music theatre. His music has been widely played in festivals across Europe, North and South America and has received awards and prizes in composition competitions in Austria, Bulgaria, Brazil, Czech Republic, France, Italy and Russia. Felipe is currently a Senior Lecturer at the Institute of Acoustics at Universidad Austral in Chile and his music is released by the British label Sargasso. Fergal Dowling (アイルランド／1965)

Ground and Background (2017) - 10'01

作品解説 :

Ground and Background was composed for Perisonic, a themed concert in which three composers reimagined the Dublin cityscape as an immersive audio-visual experience for surround sound and four video projections in three movements. Each movement expands on the metaphor of journeying through the urban environment. In movement 2, Ground and Background, the listener is jolted through a fragmented cityscape reconstructed through jump cuts. Closely recorded impulses, in a variety of exterior spaces, and distinguished by the local acoustic reflections, are contrasted with a continuously evolving distant background. We transverse an imaginary cityscape in which local details become mirrored by their context; foreground footsteps accumulate into dense blurs, and backgrounds fold into localized impulses. Perisonic was commissioned by Dublin Sound Lab and produced by Sabina Bonnici. A video part was photographed and edited by Mihai Cucu. Gráinne Mulvey and Scott McLaughlin composed Perisonic movements 1 and 3, respectively.

プロフィール :

Fergal Dowling is a composer of electroacoustic and instrumental music. He studied composition at Trinity College Dublin and, with the assistance of the Elizabeth Maconchy Composition Fellowship awarded by the Arts Council of Ireland, he completed a PhD in composition at the University of York (2006). Many of his works make use of computer-mediated performance strategies to combine instrumental or vocal forces with live electronic parts, often using mobile or dispersed performers and multichannel loudspeaker arrays. His fixed media compositions use 'granular spatialisation' to render multichannel works. His works have been presented in concert and as installations in Ireland, England, Germany, Sweden, Canada, the USA, Spain, Portugal, Brazil, Romania and Japan. His works have been presented at various festivals, including: Música Viva (Portugal), Béal Festival (Ireland), Japan Electroacoustic Festival, ISCM World Music Days (Sweden), Sonic Residues (USA), Música Viva, Future Sonic (England).

Nicolas JACQUOT (フランス／1983)

Crack-Tracks (2015) - 9'44

作品解説 :

The Crack-Tracks project is based on the compilation of electroacoustic miniatures mostly composed in between the time of larger compositions. In that sense, all the pieces are spanned with matters that originates from other projects, including mixed music compositions (e.g Close/closer derived from the piece Twice an End for flute, guitar & live-computer) and sound-installations (e.g 12.12.12, derived from the teaser of the Ceci n'est pas un concert sound installation). Thus, replaced in a new formal context, the drifting entites can assume new formal functions and live beyond their very first apparition. Besides, among other compositional considerations, creating meta-links might become a privileged mean to convey both aesthetical feelings and stylistic statements.

On a technical level, within the cycle appears more or less obviously, more or less subtly, a fluttering matter made of trills and tremoli-like figures, featured whether through harmonic or noisy sounds. Beyond this sonic fil d'Ariane, the musical presence of each piece is very singular, and should allow a grouped listening as well as an autonomous one.

Crack-Tracks is made of : I. O Means II. Mean Side III. 12.12.12 IV. Delayed Causes V. Close-Closer

プロフィール :

Nicolas Jacquot was born in 1983 in Belfort, France.

He was essentially trained in composition by Jacopo Baboni Schilingi and Giacomo Platini, and taught electroacoustic technics by Lorenzo Bianchi at the Music Conservatory of Montbéliard. He is currently continuing his education with Daniel D'Adamo at the Conservatoire Régional de Reims.

Since 2011, he is a regular partner of the Ensemble de Musique Interactive, a flexible ensemble based in the east part of France, particularly devoted to live-electronic music. His compositions have been awarded in several international competitions and performed in various festivals : FIMU (Belfort, Fr), NUIT BLANCHE (Paris, Fr), ALBA MUSIC FESTIVAL (Alba, It), EMW (Shanghai, Ch), REDSHIFT (Vancouver, Ca), ICMC/SMC (Athens, Gr), EDVARD GRIEG FESTIVAL (Oslo, Fi), NYCEMF (New York, USA), BLURRED EDGES (Hamburg, De), ...

Spanned by the works of the french narratologist Gérard Genette, his main compositional researches focuses on formal development strategies, fulfilled through functional organization of the material. He also embraces the vision of a reception-based stylistics, implying constant preoccupations towards the listening, which he likes to render ambivalent through the use of drifting poles: heterophony vs polyphony, monody vs heterophony, harmony vs inharmony or instrumental vs synthesized sources.

Omar Peracha (イギリス／1993)

Reformed (2017) - 8'20

作品解説 :

'Reformed' takes its name from a work by artist Ashleigh May Thompson, which was hanging on my wall at the time of this piece's composition. Thompson's 'Reformed' uses two distorted scans of another one of her works, which are then cut up and woven together to create a new work.

Similarly, this piece uses a recording of an old work of mine as the raw material. The entire piece is made using samples of a withdrawn wind quartet, which are processed in various ways (largely using techniques related to granular synthesis) and recombined to create new textures and sonorities. All samples are kept at the same pitch as the original, or are at multiple octave transpositions, meaning some of the original piece's harmonic language remains intact. The piece makes use of these transpositions to explore extreme contrasts of range in the frequency domain.

A Backer's Noisy Pit (2015) - 8'52

作品解説 :

'A Backer's Noisy Pit' is an attempt to explore a way to utilise and integrate everyday sound into a musical composition that entails different types of timbre, structure, texture and more. The title is an anagram of 'A Space Boy in skirt' which is the title of a poem by a Korean poet Jenny Lee. This poem is used as the thread that holds this rondo-like piece together. It is recited in Korean in original firstly and is accompanied by another voice in Turkish by Cem Özçelik in the homophonically translated form. This piece deploys different interplays between language, voice and found sound. A text is taken and read by a voice, then blended with various vocal performances and lightly manipulated found sound. The juxtaposition of the two functions of the voice - the semantic delivery and abstract uttering - takes place.

プロフィール :

Una Lee is a sound artist, performer and improviser. She composes and designs her own performances and intervention scenarios, which can be either live or fixed, or a combination of both. The main focus of her current practice lies in using spoken voice and found sonic material to create immersive compositions and performance pieces. Many of her works incorporate interdisciplinary aspects and blend performance art, visual art and theatre practice within sound-based works. Through her works, she is interested in exploring or provoking various types of human interaction. She is currently pursuing her practice-led PhD at Sonic Arts Research Centre at Queen's University Belfast, UK. She holds a BA in Composition from Hochschule für Musik in Cologne and an MA in Sonic Arts from Sonic Arts Research Centre, Queen's University Belfast.

Temple of No Religion (2016) - 10'46

作品解説 :

Piece created with material recorded at Villa Smilea of Montale Pistoiese (Tuscany-Italy), where Andrea Dami's metal and sheet metal sculptures were sampled in various recording sessions including short improvisations. The sculptures were played in different ways, from the naked hands to wooden sticks, metal, rubber, with different thickness chains etc... and different types of microphones were used with "active" recording mode, searching different sound and position in the sculptures. The piece consists of five sections, the composition process is based on the concept of musical sculpture: from section I, four repetitions/versions have been made in which each one is based on precise focused music. The title is inspired by a building Iglesia sin Religion by Colombian architect Simón Vélez, a cathedral-temple built only with bamboo canes, simple material and with Attention to eco-sustainability and that contradicts, at least in this work, the monumentality and functionality of the building itself...

Ice, but I see nothing (2017) - 13'08

作品解説：

Acousmatic Composition originally composed for 8 Loudspeaker Between artificial and natural sound, the listener is guided through aspects of our world which are rapidly changing. The perception of this continuous change is distorted. The idea of this piece comes from an interest that I have in nature and the evolution/distortion caused by humans; the early two textures in the composition give birth to a continuum of other textures slowly evolving from Landscape to Musical, from rarefied to more dense and so on. The composition process starts from two ideas: one is the transformation of Cembalo samples which I recorded, and the idea of understanding better the Stochastic and Random Walk algorithms and the way to use them in my music.

作品解説：

犬も歩けば棒に当たるように、外出の折、ふらっとお祭り等の特別な場に紛れ込んでしまうことがあります。興味のまま無目的に録音機を回してみても、あとから録れた音をじっくり聴き返すと、大抵思いもよらない変で面白い音が録れている。この作品は、紛れ込みに成功した幾つかのお祭りの録音の中から、場の雰囲気がよく表れている部分を加工し、その印象を様々な音で表しながら、お祭りの非日常的な音を織り交ぜて作っています。盆踊りや法螺貝のような動的な場や、儀式的なシリアスを持った場、通行人の声、全然関係のない音をごちゃ混ぜにして、特別な場に潜んでいるユーモラスな響きの間で、日常と非日常が曖昧になってふらふらするようなイメージを描こうと試みました。

Xenakis'sche Grauwacke I (2012) - 9'12

作品解説：

Graywacke is a term that designates a sedimentary rock which is mainly a conglomerate of various other rocks – fragments of different formations – and that, through the action of great movements of compression, result in a new kind of formation, in which sometimes still is possible to discern between the so-called cement and the minerals that were most resistant to the actions exerted on the fragments engulfed into the new formation. A Graywacke is, in itself, the product of an aleatoric event in time and space, and these are the elements that determine the final result. The piece is part of a series of pieces that abide to no relationship between them other than the aesthetic approach and the techniques employed. This could potentially fall under the category of Eco-music as the main aesthetic position is one of recycling. It also concerns the concept of self-borrowing.

Whispers of Time (2013) · 13'56

作品解説：

Whispers of Time is a 14-minute sonic exploration on the elapse of time, the stretch of time, and the reverse of time. Various sound samples have been manipulated and processed in ways that significantly affect the time domain of the samples, using mostly custom patches made with Cycling 74's Max 6 program. Throughout the composition, one hears layers of gestures move through a three-dimensional sonic space, emulating as well as alternating between hyper-real and surreal soundscapes. The multi-layer projection of the sound stage adds much depth to the music, and creates a sound world existed only in one's imagination. The juxtaposition of contrasting events in various lengths eventually becomes an inspiration for the title.

作品解説：

蛍光灯の点灯時の音から、時間や音高の変更を行い音を作りグループ化、それらを並置し作品を構築しました。蛍光灯の点灯音が偶発的なものであることから、作品構造を作る過程に偶然性が関わるチャンスオペレーションの方法を選択、ここではコンピュータを使用せず、ランプのカードを引き、組み合わせを抽出、気に入った組み合わせが出現した時点のものを作品としました。

ほぼ全ての音はコンピュータで私が作った様々な虚構の光の音ですが、一部インスピレーションの元になった多くの蛍光灯が自然点滅する美術のインスタレーション会場での録音に、私の作った音を混在させています。デジタルの中のリアリティと存在、その認知、美しさ、シュミレーションされた時間のレイヤーと現実の時間が同時に自然に並存している空間というアイデアから、音による作られた光の持続の光景と人がいる日常生活の中にそれらが溶け込んでいる部分から成っています。

Syzygy (2017) - 11'34

作品解説 :

This piece is a once-only performance of bassoon improvisation and custom software. The intervals created are based on the overtone and undertone series of the note C, which has a unique resonance on the bassoon. The software adds microtonal harmonies and dynamics to the instrument, which is fed live into two computers with USB microphones. The performance took place at sundown on August 15th in Wichita, Kansas, USA and was presented in 8-channel surround sound.

NCCTX 0247 (2017) - 14'51

作品解説 :

It is an experimental, electroacoustic sound construction with generative electronic elements. The idea of this work is based on the data transmission digital technologies.

プロフィール :

Janusz Brudniewicz: interdisciplinary artist, he is an instinctive composer : he highlights the raw and sharp sound, without embellishment and without superimposed story. He takes care over the writing, in its slow, inexorable temporal development, in its composition, in an almost algorithmic evolution. He develops a process of organic evolution, facing the brute materiality of sound tissue, which, paradoxically, gives it its "flesh" and a sort of corporeality.

Éclat | Blanc (2015) - 10'19

作品解説 :

Éclats | Blanc is part of a cycle of electroacoustic pieces that explores the timbre and creative possibilities offered by acoustic musical instruments. The flute and the timpani were used to create the base of the sound material to which layers of synthetic sounds were added. In this Éclats, the two protagonists enter into a dialogue of opposition and fusion, in which each one becomes, in turn, the main character. Flutes: Julie Delisle

Panayiotis Kokoras (ギリシャ／1974)

Granular Mosaicing (2016) - 6'55

作品解説 :

Granular Mosaicing stages a tight dialogue between different morphologies, contexts and dynamic sound quality. Through phases of accumulation and rarefaction, the listener is led to a discovery of sound ecosystem in formation, where sound events manifest themselves with energy, unpredictability and sweetness. Sudden accelerations and decelerations crawl the continuous flow of time, open the gaps that overlook what goes beyond: idle, suspended calls, which no longer appear to belong to contemporaneity, but to an archaic dimension of listening. Granular Mosaicing is an electroacoustic sound composition composed at CEMI electroacoustic studios at the University of North Texas. The piece establishes a sound ecosystem full of energetic gestures with accents and harmonic sweeps exploring both the intrinsic qualities but also the contextual potential of the sound material. There are moments where heavy shakuhachi like sounds evolve, almost instantly, into Gustav Holst's strings continuum to a lion's roar; fast gestural breathy passages are competing with zip sounds and angry dogs fade away under the pulses of Stravinsky's Rite of Spring or Stockhausen's meditative vocals of Stimmung.

プロフィール :

Kokoras is an internationally award-winning composer and computer music innovator, and currently an Associate Professor of composition and CEMI (Center for Experimental Music and Intermedia) director at the University of North Texas. Born in Greece, he studied classical guitar and composition in Athens, Greece and York, England; he taught for many years at Aristotle University in Thessaloniki. Kokoras's sound compositions use sound as the only structural unit. His concept of "holophonic musical texture" describes his goal that each independent sound (phonos), contributes equally into the synthesis of the total (holos). In both instrumental and electroacoustic writing, his music calls upon a "virtuosity of sound," a hyper-idiomatic writing which emphasizes on the precise production of variable sound possibilities and the correct distinction between one timbre and another to convey the musical ideas and structure of the piece. His compositional output is also informed by musical research in Music Information Retrieval compositional strategies, Extended techniques, Tactile sound, Hyperidiomaticity, Robotics, Sound and Consciousness.

Paysage marin avec bateaux et hydravion (2013) - 2'28

作品解説 :

Now I will do nothing but listen...

I hear all sounds running together, combined, fused or following, Sounds on the city, sounds of the day and night...

Walt Whitman, Song of Myself

"Paysage marin avec bateaux et hydravion" is a short piece inspired by the World Soundscape Project. This project was based on the discovery and recognition of the musicality in the whole world itself, and resulted in an approach which employs both natural and urban sounds, including sounds created by machines and labour, in the composition of music. The quotation above was not included casually, but is, in fact, taken from the reference book *The Soundscape: Our Sonic Environment and the Tuning of the World* by R.M. Schafer.

The piece includes recordings of natural and ambient sounds. These sounds are filtered, modified and re-organized, and then used as the basis for a short music piece. Sound elements, both natural and derived from the engine or the machinery of vessels, are then introduced, elaborated, mixed, and overlapped several times, in order to give birth to an evocative sound landscape. Lastly, the sound of a seaplane taking-off becomes the fundamental of the final chord.

The goal of this short work is to bring forth the voices, and aesthetic value, of each of these objects, and to use these sounds in an artistic way, and not simply document them. The underlying question is: "could the whole world be viewed and manipulated as a protean musical instrument?"

Ocean Night (2007) - 10'15

作品解説：

The composition evolves into a continuum, a reflection on timbre mutations (typical in spectral music) and transformations between broadband materials and pedals of height(as explored in several works by G. Ligeti). The piece achieves a good invoice from its premise creating a very dense spatial environment that envelops the listener in a perception of large space, suggesting a synthetic listening. The sound material used includes synthetic treble, vocal synthesis and short forms in the central part that interact and enhance some drones and on the end a double pulse that slows down, but strangely not in a strictly regular slowdown as the auditor might expect. Generally the incoming and outgoing fades with which almost every matter is formed prevent the listener from memorizing a narrative sense and strengthen the overall atmosphere. The acoustic execution of this piece will transmit all its spatial content in an efficient way.

(h) O m (e) (2014) - 7'30

作品解説 :

In this work is recreated ambience home using sounds that describe person's actions in his home. The anxious repetition of gestures and rituals is highlighted: going to the bathroom just after getting up, place plates on the table, the coffee-making ceremonial. Unprocessed sounds are assembled together considering the envelope, creating joints and contrasts.

To recreate a dreamlike dimension, sound bands alternate to melodic fragments.

The bands sound are useful to dilate temporal perception, while fragments refer to nostalgic memories of the character within the composition. During the final part of the piece, some elements create an apparently warm and close space, as we can see it: a fireplace, a rocking chair, a particular music played by a gramophone and the sudden visit of someone.

プロフィール :

Gian Maria Ferlito studied piano at Catania at the V. Bellini Music Institute and jazz harmony at St. Louis College in Rome with Pierpaolo Principato, Claudio Colasazza and Carlo Mezzanotte. He later perfected the techniques of improvisation with Giovanni Mazzarino at the "Enzo Randisi" Academy in Piazza Armerina. In 2009 he specializes in music teaching with a thesis on combinatorial music in creative thought getting a mention and publishing rights. requiem (2017) - 14'58

作品解説:

2011年3月11日、仙台に住んでいた頃と今の記憶を音響作品として具現化した。

-使用機材-

MacBook Pro、MAX/MSP、Logic、ピエゾ素子マイク、KAWAI CA97

-各セクションの解説-

0:00: 冒頭で始まる低域の音響は、水中にマイクを入れ、高音域を削り低域を増加。

電気が止まった夜の暗闇に怯え、津波の見えざる恐怖の記憶を表す。

0:30: ピアノの打音を削り、E・F#・G#・A・B・C#・D#を重ねる。

暗闇の中、空に広がる無数の星が輝いていた記憶を表す。

0:31: ホワイトノイズとサイン波を合成した音響が、Aを中心に7方向へ枝分かれしていく。

亡くなった魂が長い時間を経て、安らげると信じる今の思いを表す。

James Andean (カナダ／1972)

Ainnurruvar II (2013) - 10'14

作品解説：

Ainnurruvar I, composed for four performers playing an array of children's toys and objects, was in some ways an attempt to write an acousmatic or musique concrète work for a live ensemble. However, I could not resist the siren call of my acousmatic roots and the temptation to recast the work as a tape piece. The result is Ainnurruvar II, which, ironically perhaps, brings the work full cycle: tape music which had been written for ensemble, is now a work for ensemble made into tape music.

To hold to the spirit of the original, there is almost no processing of the sound materials in Ainnurruvar II.

プロフィール：

James Andean is a musician and sound artist. He is active as both a composer and a performer in a range of fields, including electroacoustic music, improvisation, sound art, and audiovisuals. He is a founding member of several groups and ensembles, including Rank Ensemble, LOS duo, and VCA. He has performed throughout Europe and North America, and his works have been presented around the world. He is a lecturer at the Music, Technology and Innovation Research Centre of De Montfort University.

PETER MACHAJDIK (スロヴァキア／1961)

THE MARATHON (2017) - 9'20

作品解説：

THE MARATHON by Peter Machajdik was realized in the Simach Art Studio in Ruzomberok, Slovakia. On April 15, 2013, two homemade bombs detonated 12 seconds and 210 yards (190 m) apart at 2:49 p.m., near the finish line of the annual Boston Marathon, killing three people and injuring several hundred others, including 16 who lost limbs. Three days later, FBI released images of two suspects, who were later identified as Chechen-American brothers Dzhokhar Tsarnaev and Tamerlan Tsarnaev. Peter Machajdik's piece THE MARATHON is a reaction on the graduating terror in the world, and on both tolerance and intolerance. It is also about hope, faith and forgiveness. But the word 'marathon' symbolises in this composition also the enormous speed of our lives that cause the fact that many people often do not know what their friends and family members are working on. The sounds and voices used in the piece have been created not only electronically (using computers and other electronic devices) but come also from the witnesses of terror, and finally even from Tsarnaevs mother who could not believe that their sons were terrorists (never ever - mama, we love you - it's impossible - it is a setup).

プロフィール :

Bratislava-born Peter Machajdík is a composer of a wide range of chamber, orchestral, electronic and multimedia works. In 1992 he was a guest of the DAAD Artists-in-Berlin Program. Early 1990s, he attended courses for composers at The Amsterdam Summer University and at the Forum Stadtpark in Graz, where he worked with Dick Raaymakers, Konrad Boehmer, Clarence Barlow, and Vinko Globokar. His music has been performed in various venues across Europe, North America, and Asia, and has been featured at international festivals such as Inventionen in Berlin, New Work in Calgary, Early Music Festival in Boston, LakeComo Festival, Nuovi Spazi Musicali in Rome, Young Euro Classic in Berlin, Hörgänge at the Konzerthaus in Vienna, Bolzano Festival 2016, Ostrava Days, Audio Art Festival in Cracow, Contrasts in Lviv, Kotor Art Festival, Sound City Days, Melos-Ethos Festival, and the Bratislava Music Festival. In 1992, Machajdik was the guest of the DAAD Artists-in-Berlin Program. He has also been awarded a 1988 Luigi Russolo Composition Prize, a 2011 International Visegrad Fund individual artist grant, and the Ján Levoslav Bella Composition Prize. He is the recipient of a 2017 grant from the Slovak Arts Council. "

Fabián Avila aka "Neural Xólotl" (メキシコ/1980)

Caballito inflorescencia (Inflorescence Little Horse) (2017) - 10'02

作品解説 :

Sounds produced via PaulStretch, microphone's feedback, soundscapes, databending noise and music, are together in this work. All of it has been mixed and created with Audacity. So, this piece make a statement about free audio software for artistic explorations without all the devices in a DAW. These restrictions make possible a search for connecting sounds via affective listening and new aesthetic perceptions. This work is dedicated to my friend Nick, since he is having intense health issues.

プロフィール :

Fabián Avila aka "Neural Xólotl" is an artist, teacher, researcher and improviser around listening arts. He got a master degree in Music Technology (UNAM, 2016) and a bachelor degree in Psychology (UNAM, 2006), both with honours. He is self-taught in electronic music and were into private lessons with Aarón Cruz on jazz theory and electric bass. His work explores ideas about tenderness, violence, death and dissapareance, using sound as a way to provoke affective listenign experiences. His artistic and academic productions have been shown in museums, galleries, symposiums and universities in Mexico and around the world. He has been awarded with a jury award from "Sound Art & Electroacoustic Music International Competition 2016" (Binaural Nodar), 1st. Place in "Visiones del Arte 2014" (MUAC) and 4th. Place in "Concurso Música y Diseño 2013" (Circo Volador).

Alexander Senko (ロシア／1965)

Five Cycles (2016) - 12'00

作品解説：

Duration of sounds, time intervals between sounds, and location of sounds in space correspond to the ranges of numbers as values of mathematical functions. Duration of sounds varies from the smallest unit known as one sample, which is perceived by human ear as a click, to the fragment playing continuously with its fundamental frequency. Intervals between individual sounds also range from longer pauses to continuous sound with no interruptions. Each "splash" of sound has a precise location in space. Several of these sound sequences play simultaneously; their periods never overlap and create an infinite number of combinations. For the composition I have used synthesized sounds, sounds produced by sound devices and transformed fragments of audio recordings.

Created with programming language Pure Data.

プロフィール：

Alexander Senko was born in Moscow, Russia. Graduated from Gnesins Institute as a sound engineer. Composer, sound producer, Alexander runs a laboratory "Acoustic Images" (research and production of interactive installations). Alexander's interests include visual programming language Pure Data, electronic and electroacoustic music, sound art, audio-visual interaction.

Selected exhibitions and performances:

"9th Festival International De La Imagen", Manizales, Colombia - "Pure Data convention", Weimar, Germany - "PIKSEL[X]", Bergen, Norway - "Prepared Environments", Moscow, Russia - "FILE 2014", Sao Paulo, Brazil - "(h)ear XL II", Heerlen, the Netherlands - "Radical dB" festival, Zaragoza, Spain - "The Engine Room" sound art exhibition, London, UK, 2015 - "Ars Electronica 2015", Linz, Austria - "MADATAAC 07", Madrid, Spain
